Xinyue Feng

Kean University | lily.china@outlook.com | lily-feng.com

SUMMARY

Computer Science student with a strong interest in Human-Computer Interaction (HCI) and user-centered design.
Experienced in building interactive applications and collaborating in team-based development environments.

EDUCATION

Kean University Expected 2027
B.S. in Computer Science
Relevant Coursework: HCI/UX, Software Engineering, Data Structures, Databases, Web Development

SKILLS

Programming: Java, JavaScript, React (Vite), HTML, Tailwind CSS
Tools: Git/GitHub, VS Code, PostgreSQL, API development with Node.js and Express
Soft Skills: Strong communication, proactive and positive mindset, reliable team coordination, ability to take initiative and support group collaboration

INTERNSHIP EXPERIENCE

Chengdu Sanying Technology Co., Ltd. May 2026 – Jun 2026
Computer Vision Data Processing Intern
Assisted with foundational technical tasks including data organization and image classification; collaborated with the team to complete assigned data-processing work.

Chengdu Sheer Tianyi Game Technology LLC. Jul 2026
TA Intern Engineer, Information Technology Department
Worked with Cascadeur3D animation AI frame interpolation and third-party ticketing-platform price-comparison crawler technologies; applied academic knowledge to assigned engineering tasks.

EXPERIENCE & AWARDS

Dean's Honor List, Kean University Spring 2026
Dean's Honor List for the Spring 2026 semester at Kean University

The Honor Society of Phi Kappa Phi 2025–2026
Founded in 1897, Phi Kappa Phi (ΦΚΦ) is the oldest and one of the most prestigious multidisciplinary academic honor societies in the United States. Membership is highly selective, recognizing exceptional academic excellence, with eligible seniors typically ranking in the top 10% of their class.

Wenzhou-Kean University Dean's Third Prize 2023–2024
Academic Excellence Award

Overseas Exchange Scholarship Second Prize 2025
Merit-based Exchange Funding

CiGA GAME JAM 2024
Collaborated in a 48-hour game development sprint, designed and delivered a playable prototype
Contributed to gameplay design and interaction flow through iterative testing and continuous team feedback

Lanqiao Cup National Software & IT Competition 2024
Third Prize in Visual Arts Design track (Zhejiang Division)

PROJECTS

Ace Attorney-Inspired Mini Game | Java
Developed a six-level Java platformer set in the world of Ace Attorney, featuring jumping, enemy stomping and hidden blocks
Implemented structured game logic and state management, improving code readability and scalability

Wizarding World - A Harry Potter Mod for Terraria | tMod
Developed the Terraria tMod Wizarding World - A Harry Potter Mod for Terraria

Yuzu Onsen Capybaras - A Cozy Pixel-Art Life Sim | JavaScript, Electron
Led development with AI coding and image tools: care for seven capybaras, make friends, explore 30 cave floors, celebrate 16 festivals

Otherworlds - A Crossover Boss Mod for Terraria | C#, tModLoader
Leading development with AI coding and image tools: 38 bosses from Hollow Knight, Silksong, Dead Cells, Cuphead and Isaac

AI Recipe Remix - Recipes from What's in Your Fridge | React, Express, OpenAI API
Built a full-stack web app that turns the ingredients a user has on hand into three recipes, each with a generated photo
Wrote the React front end, the Express back end and the prompts; the 2026 redesign and demo mode were built with AI coding tools

Tic-Tac-Toe vs. AI - A Game That Shows How the Computer Thinks | JavaScript
Wrote a five-rule tic-tac-toe AI; added minimax and a "Show AI thinking" view of every square with AI coding tools

RESEARCH

The Invisible Scheduler: Dragging a Sprite Can Change What a Scratch Program Does Sep 2026
arXiv preprint 2609.36147 (cs.SE), first author

The Invisible Throttle: Running on Borrowed Time in Scratch Sep 2026
arXiv preprint 2609.36152 (cs.SE), first author

Few-shot learning with task adaptation for multi-category gastrointestinal endoscopy classification Sep 2024
Published in Biomedical Signal Processing and Control
Participated in literature review and interdisciplinary collaboration on machine learning for biomedical tasks

A lightweight dependency-based deep metric learning for medical image classification Nov 2026
Published in Biomedical Signal Processing and Control
Contributing author on lightweight deep metric learning for medical image classification

ACTIVITIES

Sports Intern Aug 2024
Chengdu 2025 World Games Executive Committee | Outstanding Intern
Assisted with pre-event preparations for the Chengdu 2025 World Games, including competition logistics and cross-team coordination.

Volunteer Experience Nov 2023
Provided tutoring for rural children and organized inclusive sports activities for autistic youth
